HIGH PERFORMANCE SCOTTISH LEYS

2026

TARFF HIGH PERFORMANCE SCOTTISH LEYS

Tarff Valley leys always give very high quality soluble carbohydrate/sugar production in both cut and grazed forage to ensure the best feed conversion efficiency.

SOLWAY

Weight per acre pack – 14kg

Suitability

- A specialist long term grazing mixture for sheep, dairy or beef systems
- Suited to a wide range of soil types and locations
- Can be cut for hay or silage and suitable for grazing

Advantages

- Built for maximum persistency, ground cover and winter hardiness
- Gives a dense, highly digestible, leafy sward of high sugars to boost meat and milk production
- White clover improves dry matter intake, protein and mineral content, in addition to enhancing palatability

	CONTAINS BY WT
NASHOTA (TETRAPLOID PRG)	21%
ASTON CHIEFTAIN (DIPLOID PRG)	20%
BIJOU (TETRAPLOID PRG)	20%
NIFTY (DIPLOID PRG)	15%
BOYNE (DIPLOID PRG)	15%
BARBLANC, IONA, RIVENDEL (WHITE CLOVER BLEND)	6%
RASANT (TIMOTHY)	3%

PERMANENT

Weight per acre pack – 14kg

Suitability

- An outstanding permanent mixture destined for long term management
- Can be cut for hay or silage and suitable for grazing

Advantages

- Ideal for a multitude of grassland management uses
- Hardy, persistent with a dense lower sward
- Produces an abundance of top quality dry matter forage

	CONTAINS BY WT
NASHOTA (TETRAPLOID PRG)	21%
CALIBRA /DIWAN (TETRAPLOID PRG)	20%
NIFTY /BOYNE (DIPLOID PRG)	20%
TODDINGTON/GLENROYAL (DIPLOID PRG)	20%
GENESIS (DIPLOID PRG)	10%
BARBLANC, IONA, RIVENDEL (WHITE CLOVER BLEND)	6%
RASANT (TIMOTHY)	3%

OTHER SEEDS TARFF VALLEY OFFERS:

- Organic seed mixes
- Specialised grass and forage mixes, mixed to order
- Greening compliant options
- Forage crops
- Cereal seed
- Arable silage mixes
- Amenity grass and wildflower mixes
- Horse and pony seed mixes
- Game cover

LONG TERM PATCHING

Weight per acre pack - 10kg

Suitability

- Overseeding fields to improve existing swards
- Useful if desirable species within the sward is >60% or ground cover is <75%
- Ideal for areas where the sward has been damaged

Advantages

- Compatible with longer term mixtures already established in the field

	CONTAINS BY WT
CALIBRA/NOLWEN (TETRAPLOID PRG)	35%
BIJOU/HURRICANE (TETRAPLOID PRG)	30%
TEMPRANO (DIPLOID PRG)	25%
GUSTO (DIPLOID PRG)	10%

GALLOWAY

Weight per acre pack - 14kg

Suitability

- A 2-3 year highly intensive mixture

Advantages

- Produces up to 4 cuts of top quality forage per year, rich in sugars (soluble carbohydrates)
- Gives early and late season grazing
- Ideally grazed first, post reseeding to encourage tillering and maximise the perennial ryegrass contribution

	CONTAINS BY WT
MERIBEL (DIPLOID IRG)	35%
ASTON CRUSADER (TETRAPLOID HYBRID RG)	30%
CALIBRA/DIWAN (TETRAPLOID PRG)	25%
NIFTY (DIPLOID PRG)	10%

MULTICUT

Weight per acre pack - 14kg

Suitability

- A high quality 3-4 year conservation ley designed to maximise the feed conversion efficiency to meat and milk

Advantages

- Utilises the yield benefit and grass quality from intensive regimes to provide earlier first cut dates
- Contains high yielding varieties that produce top sugar levels best suited to good fermentation and feeding quality

	CONTAINS BY WT
CALIBRA/GUSTO (TETRAPLOID PRG)	40%
ASTON CRUSADER (TETRAPLOID HYBRID RG)	25%
NIFTY (DIPLOID PRG)	20%
SOLID (TETRAPLOID HYBRID RG)	15%

STEWARTRY (options with or without clover available)

Weight per acre pack – 14kg

Suitability

- An exceptional long term dual purpose ley (min 5 to 7 years duration), successfully used widely across our area
- First choice for top silage yields combined with high quality grazing. Tarff's 'Rolls Royce' choice for unbeatable long term production

Advantages

- Produces highly digestible forage from inherently high-quality grasses
- Infinitely flexible to a whole range of farm enterprises within South and West Scotland
- Gives quality early spring growth without going stemmy or seedy
- Maintains a lush leaf habit
- Contains high sugar varieties

	CONTAINS BY WT
CALIBRA (TETRAPLOID PRG)	29%
BIJOU (TETRAPLOID PRG)	20%
ASTON CONQUEROR (DIPLOID PRG)	13%
ASTON CHIEFITAIN (DIPLOID PRG)	13%
NIFTY (DIPLOID PRG)	12%
TODDINGTON (DIPLOID PRG)	10%
IONA/RIVENDEL (OPTIONAL WHITE CLOVER)	5%
RASANT (TIMOTHY)	3%

FAST GRASS

Weight per acre pack – 14kg

Suitability

- Forage production and short term grazing
- Ideal for undersowing or sowing after maize
- A perfect choice to suppress indigenous grass weed problems

Advantages

- Short term option for boosting forage
- Robust autumn and spring growth
- Production of forage dry matter at low temperatures
- Grasses high in sugar and soluble carbohydrates

	CONTAINS BY WT
TEANNA (TETRAPLOID IRG)	65%
SHAKIRA (DIPLOID IRG)	35%
